

TESTING Firefox using Jmeter

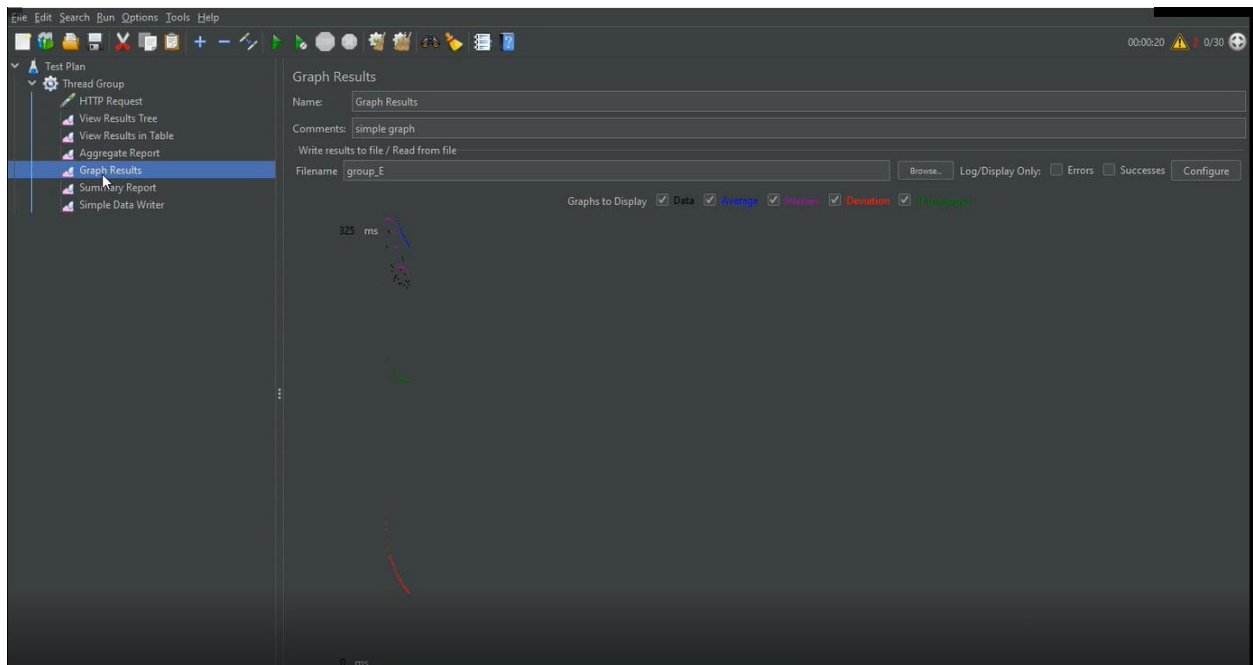

The particular of Test on FireFox website was: Firefox Browsers, Products, and Innovation

This Page list Views: for example, view result true. The result tree is what show green pass.

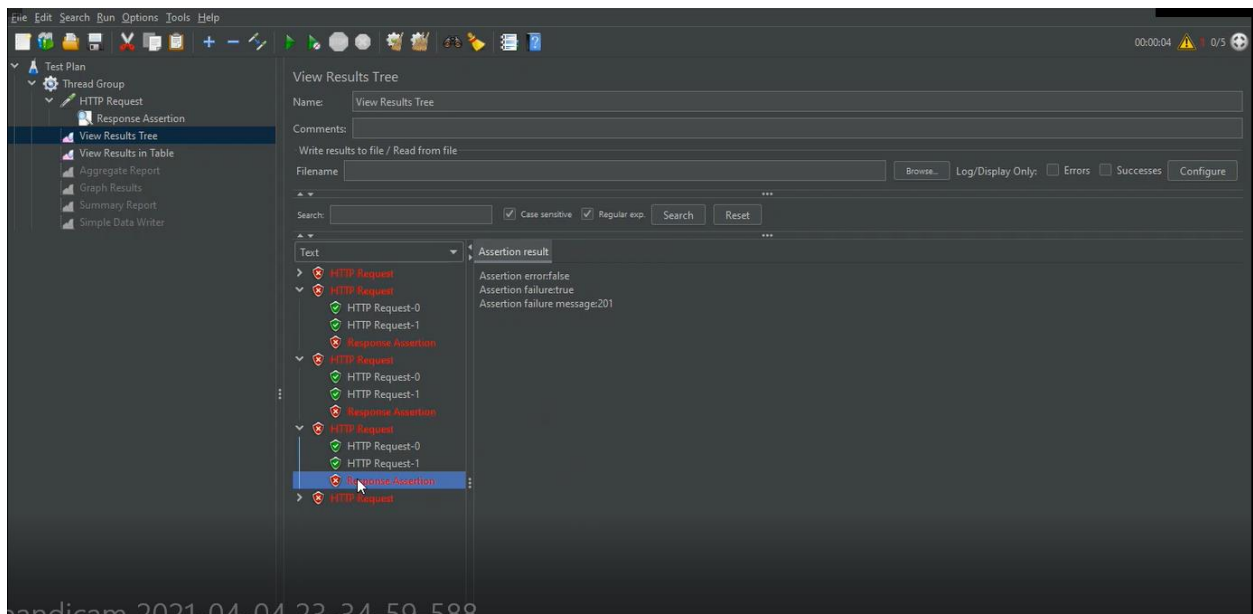

TESTING Firefox using Jmeter

Graph result as highlighted shows a graph of data.

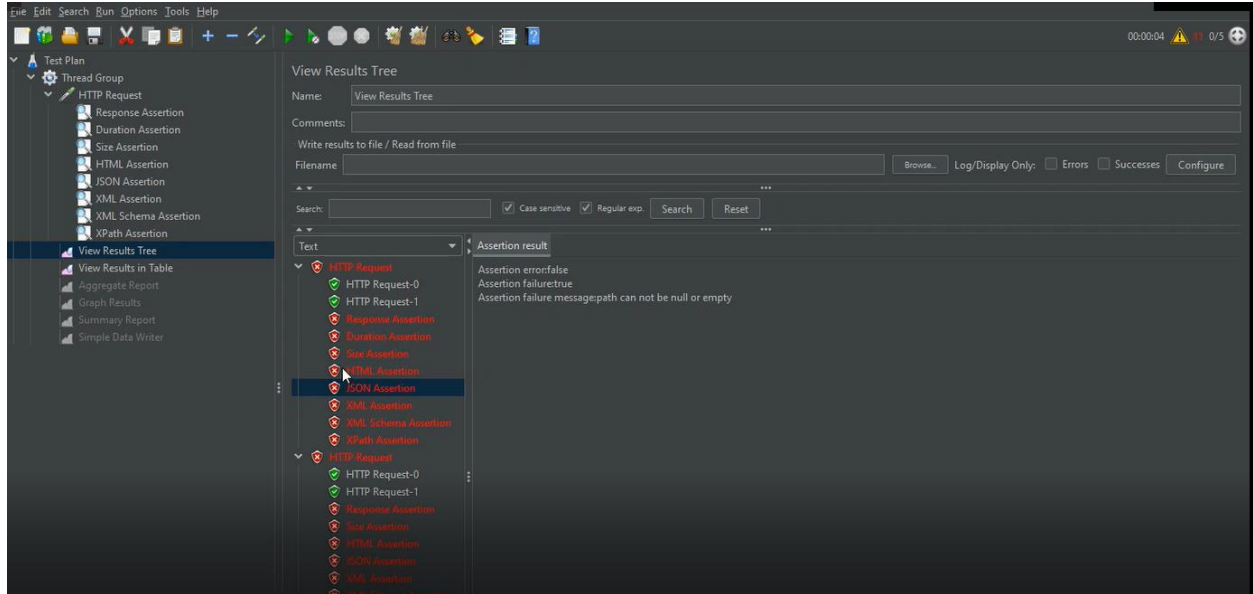

Response assertion shows changes to 201. It all failed.

TESTING Firefox using Jmeter

This figure test the following assertion:

Response, duration, size, JSON, XML, XML Schema, XPath assertion. It shows failed because some have not have a correct specifications, or like runtime duration in case of duration assertion.

Jmeter listen reporting on: Products, Innovation, Firefox Browser.

This detect anything going those chosen area of test and report it on the view table report.

The screenshot shows the JMeter 'View Results in Table' window. The left sidebar lists the test plan structure, including 'Thread Group' and 'Firefox browsers'. The main pane displays a table of test results for the 'View Results in Table' view. The table has columns: 'Sample...', 'Start Time', 'Thread Name', 'Label', 'Sample Ti...', 'Status', 'Bytes', 'Sent Bytes', 'Latency', and 'Connect Time(ms)'. The table contains 21 rows of data, showing test results for various endpoints and threads.

Sample...	Start Time	Thread Name	Label	Sample Ti...	Status	Bytes	Sent Bytes	Latency	Connect Time(ms)
1	01:34:36.237	Thread Group 1-1	/captivportal/generate_204-1	168	✓	231	543	0	91
